SECTION 4: First aid measures

4.1. Description of first aid measures

- In case of skin contact:
 - Areas of the body that have or are only even suspected of having come into contact with the product must be rinsed immediately With plenty of running water and possibly with soap. OBTAIN IMMEDIATE MEDICAL ATTENTION. Wash thoroughly the body (shower or bath). Remove contaminated clothing immediately and dispose off safely.

 - After contact with skin, wash immediately with soap and plenty of water.
- In case of eves contact
 - After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time, then consult an opthalmologist immediately
 - Protect uninjured eye
- In case of Ingestion: Induce vomiting only on doctor's advice
- In case of Inhalation:
- In case of inhalation, consult a doctor immediately and show him packing or label. 4.2. Most important symptoms and effects, both acute and delayed
 - Contact a poisons centre
- 4.3. Indication of any immediate medical attention and special treatment needed
 - In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

SECTION 5: Firefighting measures

- 5.1. Extinguishing media
 - Suitable extinguishing media:
 - In case of fire: Use CO2, Foam, Chemical powders to extinguish. Extinguishing media which must not be used for safety reasons: None in particular.
- 5.2. Special hazards arising from the substance or mixture Combustion may liberate toxic or very toxic gases. Do not breathe fumes. Do not inhale explosion and combustion gases. Burning produces heavy smoke. 5.3. Advice for firefighters
- - Use suitable breathing apparatus

Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Move undamaged containers from immediate hazard area if it can be done safely

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures Wear personal protection equipment. Remove all sources of ignition. Wear breathing apparatus if exposed to vapours/dusts/aerosols. Provide adequate ventilation. Remove persons to safety. Use appropriate respiratory protection. See protective measures under point 7 and 8. 6.2. Environmental precautions Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains. Retain contaminated washing water and dispose it. In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities. Suitable material for taking up: absorbing material, organic, sand

- Eliminate all unguarded flames and possible sources of ignition. Do not smoke. 6.3. Methods and material for containment and cleaning up

Collect the spilled product with no-sparking tools

Rapidly recover the product. To do so, wear a mask and protective clothing. Recover the product for re-use if possible, or for elimination. The product might, where appropriate, be absorbed by inert material. After the product has been recovered, rinse the area and materials involved with water.

6.4. Reference to other sections

See also section 8 and 13

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Keep away from flame and sparks. Avoid accumulating electrostatic charge.

Place recipients on the ground whilst decanting, and wear anti-static clothing and shoes.

- Avoid contact with skin and eyes, inhalation of vapours and mists.
- Use localized ventilation system.
- Don't use empty container before they have been cleaned.

Before making transfer operations, assure that there aren't any incompatible material residuals in the containers.

Contamined clothing should be changed before entering eating areas. Do not eat or drink while working. Do not smoke while working. See also section 8 for recommended protective equipment. 7.2. Conditions for safe storage, including any incompatibilities
 Always keep in a well ventilated place.
 Store at below 30 °C. Keep away from unguarded flam e and heat sources. Avoid direct exposure to sunlight.
 Keep away from food, drink and feed. Incompatible materials: None in particular. Instructions as regards storage premises: Cool and adequately ventilated. Safety electric system. 7.3. Specific end use(s) No further recommendations. Refer to point 1.2 **SECTION 8: Exposure controls/personal protection** 8.1. 8.2. Exposure controls Eye protection:

Use eye protection devices. Example: closed safety visors, goggles with side protection. Do not wear contact lenses.

Protection for skin:

Use clothing that provides comprehensive protection to the skin, e.g. cotton, rubber, PVC or viton. Protection for hands:

Because of the synergetic effect of the substances contained in the formulation it is not possible to identify a unique material that can resist to their fusion. Multi - layer protective gloves can be suitable for mixes of substances. Pay attention to the data about grade of protection and of permeation rate furnished by the producer of the gloves about the substances listed on point 3 of this sheet. Respiratory protection:

Use adequate protective respiratory equipment, e.g. A2 or A2P2 or A2P3.

Thermal Hazards:

None known

Environmental exposure controls: None known

Appropriate engineering controls:

None

SECTION 10: Stability and reactivity

10.1. Reactivity Stable under normal conditions 10.2. Chemical stability Stable under normal conditions 10.3. Possibility of hazardous reactions No dangerous reaction is stored and used appropriately. 10.4. Conditions to avoid Avoid accumulating electrostatic charge. Vapours can form explosive mixtures with air. 10.5. Incompatible materials Avoid contact with combustible materials. The product could catch fire. 10.6. Hazardous decomposition products vapours potentially dangerous to health may be released.

SECTION 16: Other information

Text of phrases referred to under heading 3:

- H226 Flammable liquid and vapour
- H304 May be fatal if swallowed and enters airways.
- H319 Causes serious eye irritation. H335 May cause respiratory irritation
- H373 May cause damage to organs through prolonged or repeated exposure. H315 Causes skin irritation.
- H312 Harmful in contact with skin.
- H332 Harmful if inhaled.
- H225 Highly flammable liquid and vapour.
- H336 May cause drowsiness or dizziness.
- EUH066 Repeated exposure may cause skin dryness or cracking. H302 Harmful if swallowed.
- H318 Causes serious eye damage.
- H411 Toxic to aquatic life with long lasting effects. H317 May cause an allergic skin reaction.
